

○ 纤细柔顺 自然稳定

一款轮廓纤细、柔顺的碳纤脚，其符合人体结构的设计，易于穿脱。多轴功能提供了最大化的舒适度，并在脚跟部位提供了不间断的碳纤维，给患者提供更轻便和更为自然的步态。

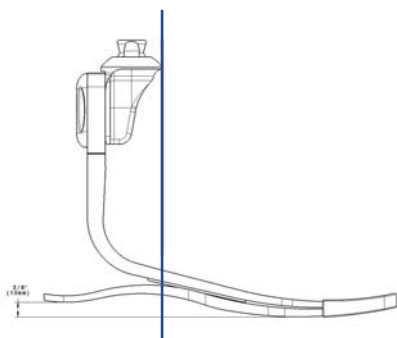

It is a slim profile, carbon fiber foot system with a slender, anatomic design for easy fit and finish. Its multi-axial function provides maximum comfort and the uninterrupted strands of carbon fiber in the full length heel provide patients with effortless rollover and a more natural gait.

结构示意图/Structure sketch map

- 1、Impact resistant, top surface film /耐冲击性的表层
- 2、High-compression fiber layer /高压纤维层
- 3、High-modulus core technology /核心技术高模层
- 4、High-tension fiber layer /高拉力纤维层
- 5、Impact resistant, bottom surface film /耐冲击性的底层

产品特点/Specifications

- ◆ 一款轮廓纤细、柔顺的碳纤脚, 其符合人体结构的设计, 易于穿脱。
- ◆ 多轴功能提供了最大化的舒适度, 并在脚跟部位提供了不间断的碳纤维, 给患者提供更轻便和更为自然的步态。
- ◆ 仿真足弓弹板以在屈曲、伸展时通过减震及脚板屈曲来提高脚跟着地时的稳定性。
- ◆ 脚踝部分柔顺设计更符合人体构造的标准, 更容易在脚外面安装美容脚壳, 并容易穿脱。
- ◆ 全长没有螺丝的单独脚板设计, 确保了站立期翻转表现和极高的舒适度。
- ◆ 分叉的脚趾与脚跟设计, 提供了极好的在不均匀路面上行走的倒位与脚内翻的稳定性。
- ◆ It is a slim profile, carbon fiber foot system with a slender, anatomic design for easy fit and finish.
- ◆ Its multi-axial function provides maximum comfort and the uninterrupted strands of carbon fiber in the full length heel provide patients with effortless rollover and a more natural gait.
- ◆ Artificial arch spring enhances stability at heel strike through shock absorption and flexion as the artificial spring flexes and extends.
- ◆ Slender design results in an ankle that fits the anatomical design of the ankle, thus making the foot easy to cover cosmetically; and easy to fit & finish.
- ◆ A full length, unbolted sole plate ensures seamless stance phase roll-over for superior comfort.
- ◆ Split toe/heel design provides excellent inversion and eversion for patient stability on uneven terrains.
